
A LEVEL CHEMISTRY

Context:

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behaviour and the changes they undergo during a reaction with other substances.

Reading Material:

A selection of reading material will be suggested for you to read. I will also provide links to some interesting websites. There might even be the odd joke.

Tasks:

You will be provided a series of bridging tasks to help you consolidate some of the key skills and concepts that you will need for your A-level course.

The task pack and associated quizzes will be provided via Edmodo.

What to watch:

On line there exists a vast amount of videos that would be useful to your studies or that are just interesting.

Suggested videos will be added to the Edmodo group. You are encouraged to share any interesting ones that you find too.

Where to sign up:

If you are interested in studying A-level Chemistry, then please sign up to the Edmodo group "Further Chemistry".

The class code for this is: ifiazt
